

Distillation of Multi-Party Non-Locality With and Without Partial Communication

Helen Ebbe and Stefan Wolf

University of Lugano (USI), Switzerland

IEEE International Symposium on Information Theory, 2013

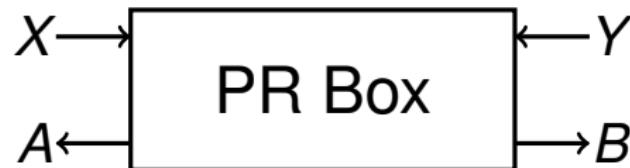

Popescu-Rohrlich Box and Non-Locality

S. Popescu
1994

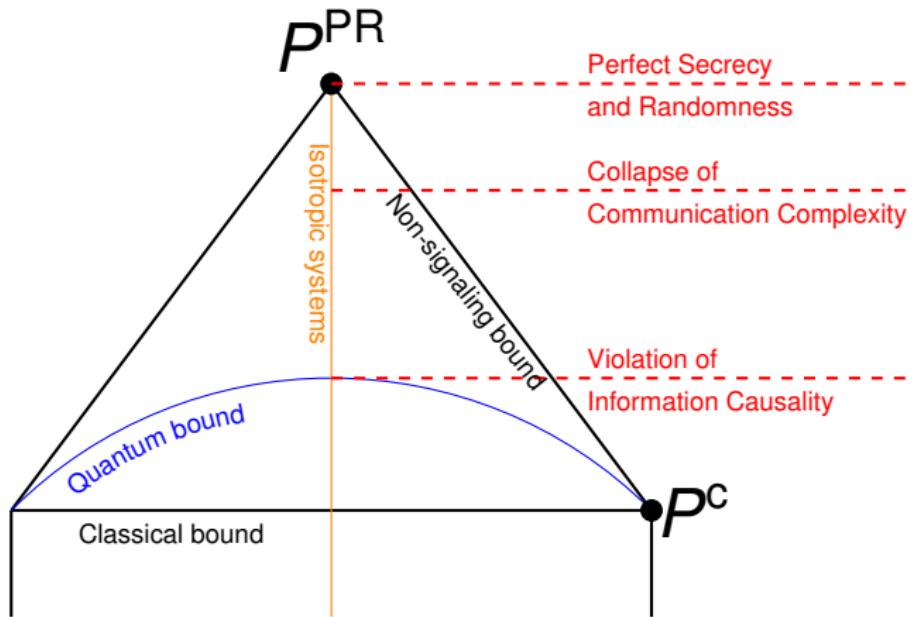

D. Rohrlich

$$A \oplus B = X \odot Y$$

Local strategies: 75%
Quantum strategies: $\sim 85\%$

Motivation for Non-Locality Distillation

Non-Locality Distillation

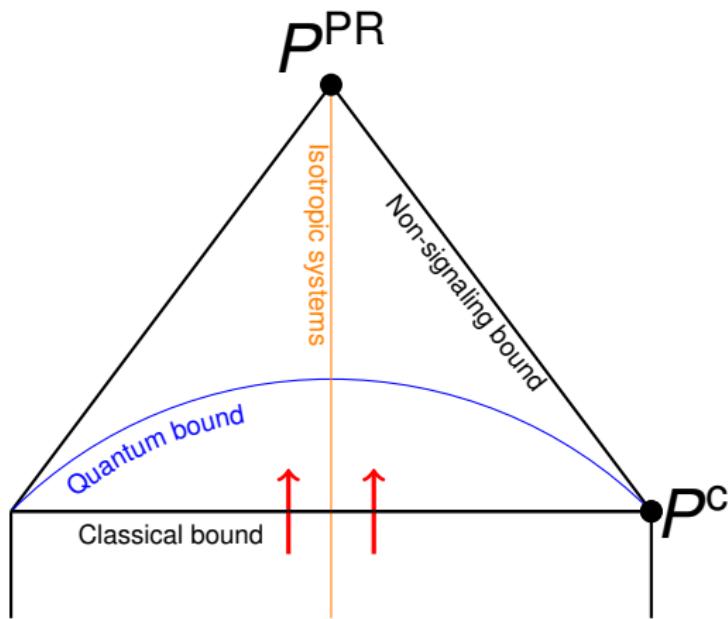

A non-locality distillation protocol takes weak non-local boxes to stronger ones.

Possible tools:

- ▶ copies of the weak box
- ▶ shared randomness
- ▶ preshared information
- ▶ local operations

P. Skrzypczyk

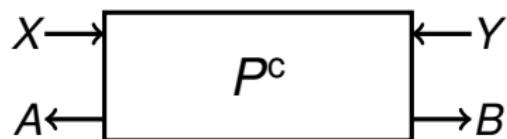

Brunner-Skrzypczyk Protocol

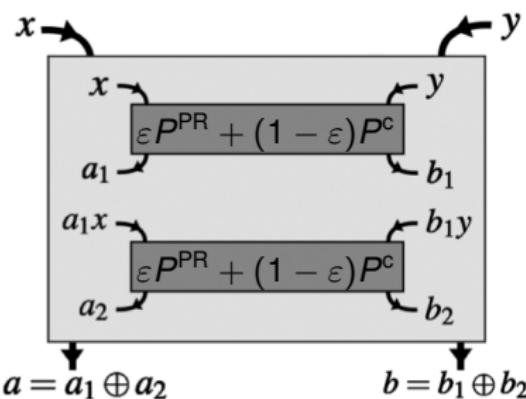

Distillation of a convex combination of these two boxes

$$A \oplus B = X \odot Y$$

$$A \oplus B = 0$$

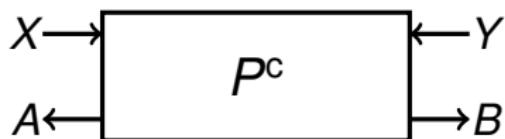

Brunner-Skrzypczyk Protocol

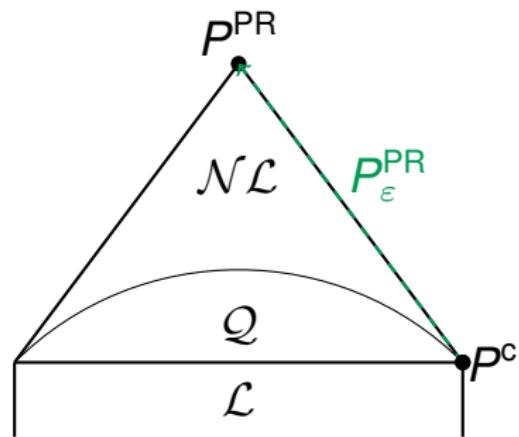

Distillation of a convex combination of these two boxes

$$A \oplus B = X \odot Y$$

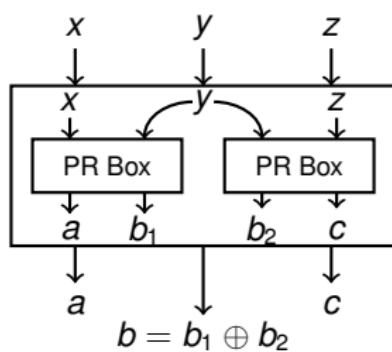

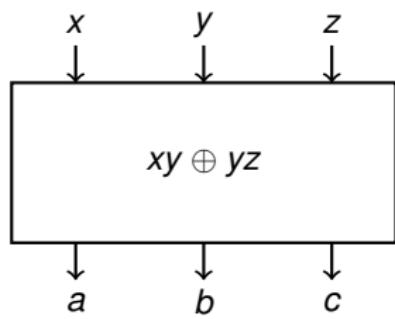

$$A \oplus B = 0$$

Distillation Using Partial Communication

Simulation of an extremal tripartite box of the non-signaling polytope with PR boxes

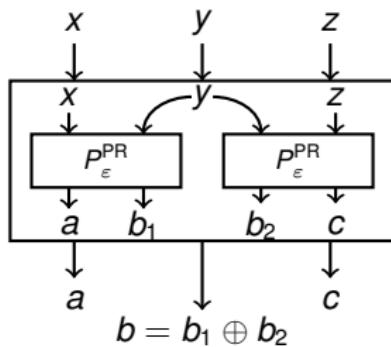

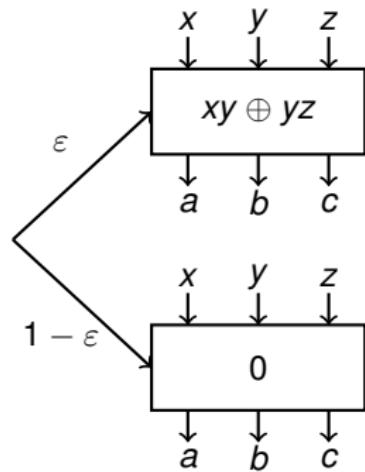

$$a \oplus b \oplus c = xy \oplus yz$$

$$\begin{aligned} a \oplus b_1 &= xy \\ b_2 \oplus c &= yz \end{aligned}$$

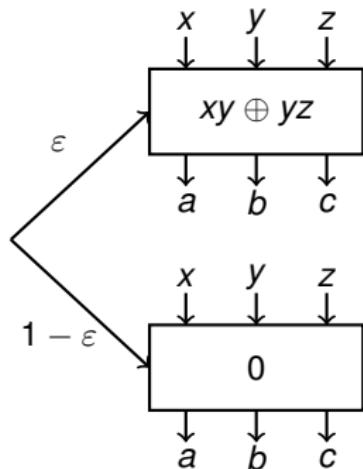

Distillation Using Partial Communication

Simulation of the imperfect extremal box with imperfect PR boxes

Distillation Using Partial Communication

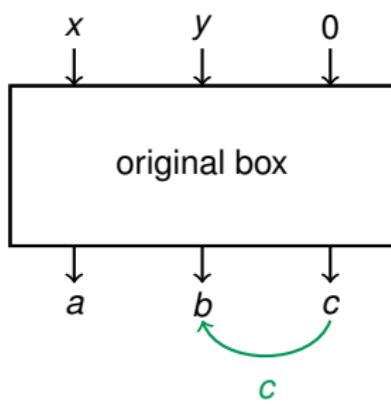

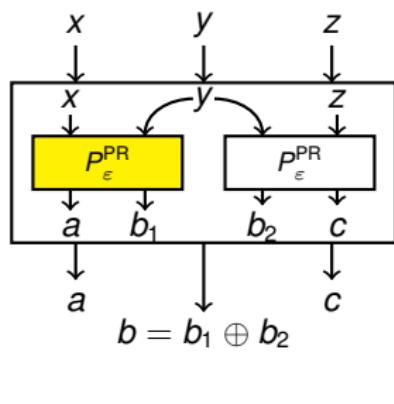

Simulation of the imperfect extremal box with imperfect PR boxes

inputs	$xy \oplus yz$	0
000	0	0
001	0	0
010	0	0
011	1	0
100	0	0
101	0	0
110	1	0
111	0	0

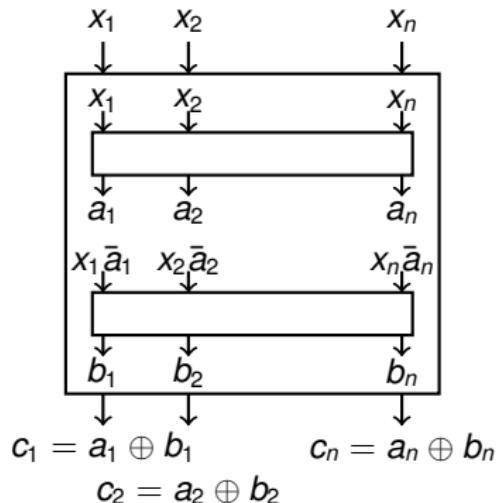

Distillation Using Partial Communication

Simulation of an imperfect PR box using the original box and communication

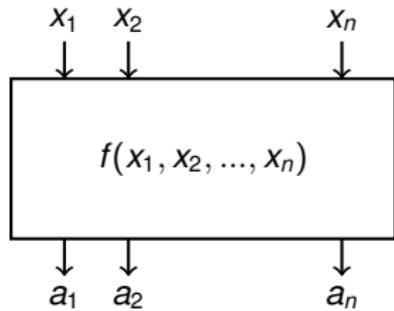

Further Results

Multipartite Generalization of the Brunner-Skrzypczyk Protocol

Distillation of Full-Correlation Boxes using Partial Communication

$$a_1 \oplus \dots \oplus a_n = f(x_1, \dots, x_n)$$

Conclusion

- ▶ Arbitrarily weak multipartite generalizations of the PR box can be distilled arbitrarily closely to the generalized PR box using a generalization of the BS protocol.
- ▶ Full-correlation boxes can be distilled using partial communication.
- ▶ Weak non-local boxes can replace communication.
